

helping
architects and
builders achieve
energy ratings of
up to 10-stars

... by making Australia's most energy efficient windows

Double Hung Windows

Since 1990, Paarhammer windows & doors have been setting the benchmark in energy efficiency in Australia.

Re-create the look of yesteryear with all the advantages of modern technology like extreme energy saving, high sound protection and increased security. Even for inner city terraces protected by covenants - where street appearance cannot change - turn to Paarhammer for the solution. You can create a quiet oasis where noise stays outside and drafts no longer exist.

Made to order, Paarhammer look-alike double hung windows achieve up to 7.5 WERS energy stars in the WERS ratings, thereby offering energy savings of up to 85%. They are essentially tilt & turn windows using German hardware, offering two opening positions and metal-to-metal security locking. Child restrictions can be accommodated.

Glass & Glazing

In double glazing the airgap used is 16mm, whereas in triple glazing it is twice 12mm. Any glass combination is possible including Low-E, I-glass or heat mirrors. Combining superior frames, seals and craftsmanship, Paarhammer can achieve the lowest U-value of any window made in Australia. (WERS 0.8)

In addition to employing the latest energy saving technologies that achieve massive energy savings of up to 85%, Paarhammer windows can also deliver an astonishing noise reduction of up to 45dB. That is some 80-90% over conventional windows.

Custom-made

With virtually no limit to size and shape, the Paarhammer double hung window system is adaptable to any wall and suitable for any style of building.

There are a variety of glazing and timbers to choose from, including FSC® (Forest Stewardship Council®) certified timbers. Products can be ordered sanded only or spray painted in a range of finishes and colours.

LOCK

TILT

OPEN

CAD drawings on website

The German tilt and turn fittings feature the flexibility of two opening positions (side opening casement or top opening hopper) operated with one handle. These fittings have several locking pins which lock the sash into the frame to provide security locking, thereby eliminating drafts and noise.

E-lock for home security systems, automated ventilation, in-glass venetians, outside shading options, etc available on request.

Outstanding quality, security features and design flexibility ensures architects, developers and home-owners achieve superior results.

Key features:

- Energy efficient
- Noise reduction
- Custom-made
- Sustainable timbers
- Australian made
- Quality workmanship
